ABOUT ME

Python & Django Developer with over 3+ years of experience designing and scaling high-performance web applications and RESTful APIs. Expert in leveraging Python 3.x, Django, and Django REST Framework to build modular, secure, and maintainable software. Proven ability to optimize PostgreSQL and MySQL databases, integrate complex third-party APIs, and implement robust role-based access control (RBAC) in Agile environments. Committed to high code quality through rigorous unit testing, containerization with Docker, and standardized API documentation.

PROFESSIONAL SUMMARY

Python Developer | Code Icons Technology, Pune. | APR 2023 – Present

- **Dedicated Python and Django developer** with over **3+ years of experience** in designing, developing, and implementing robust web applications and **RESTful APIs**.
- Expertise in **software design, development, and Unit Testing** using **Python 3.x** and **Django** frameworks.
- Strong proficiency in building and maintaining **scalable web applications** utilizing **Django REST Framework (DRF)** for seamless data handling.
- Extensive experience in **database design** and optimization using **PostgreSQL, MySQL, and SQLite** by writing efficient queries and implementing **indexing**.
- Proven track record of integrating **third-party APIs** including **payment gateways, email services, and social logins** into enterprise applications.
- Highly skilled in **Agile/Scrum environments**, actively participating in **sprint planning, daily standups**, and retrospective meetings to ensure timely delivery.
- Utilized **Git and Bitbucket** for robust **version control**, conducting thorough **code reviews** to enhance overall code quality.
- Advanced knowledge of **full-stack development**, integrating front-end technologies like **HTML5, CSS3, and JavaScript** with backend logic.
- Experienced in creating and maintaining detailed **API documentation** using **Swagger and OpenAPI** standards for internal and external stakeholders.
- Proficient in **containerization tools like Docker** to ensure consistent development and deployment environments.
- Implemented **secure, role-based access control (RBAC)** systems to manage user permissions and data security effectively.
- Skilled in **manual and automated unit testing** to ensure high application stability and reliability.
- Adept at using **Django ORM** for efficient database interactions and maintaining a **modular app structure** for long-term scalability.

PROJECTS

Project 1: Insurance Transaction System

Domain: Insurance | **Client:** Max Life Insurance

Tech Stack: Python, Django, MySQL/Oracle, HTML, CSS, JavaScript.

- **System Architecture:** Developed a comprehensive web-based Insurance Transaction System to streamline core policy management and customer engagement workflows.
- **Modular Data Design: Engineered** scalable modules to manage complex policy attributes, including benefit structures, terms, and conditions for diverse insurance types.
- **Feature Engineering:** Built a comparison engine allowing users to evaluate vehicle, health, and life insurance plans, enhancing the customer decision-making process.
- **Administrative Tools:** Implemented a dynamic **Content Management System (CMS)** that empowered administrators to update policy data and latest schemes in real-time.

- **Security & RBAC:** Designed and integrated a secure, **role-based access control (RBAC)** system to strictly manage data visibility and permissions for internal and external users.
- **Full-Stack Optimization:** Created robust backend logic for policy applications and renewals while ensuring a responsive, user-friendly UI for an enhanced customer experience.

Project 2: Pharmacy Management System

Domain: CRM | **Client:** Med+

Tech Stack: Python, Django, SQLite/MySQL, HTML, CSS, JavaScript.

- **Process Automation:** Designed and developed a full-featured web application to automate end-to-end pharmacy operations for medical distributors.
- **Operational Modules:** Engineered specialized modules for Purchase Order Management, Drug Sales, Stock Maintenance, and automated Report Generation.
- **Inventory Intelligence:** Integrated dynamic inventory tracking featuring automated low-stock alerts and batch-wise stock management for precise supply chain control.
- **Real-Time Processing:** Developed high-performance billing and sales processing features with integrated stock auto-adjustment to ensure data integrity.
- **Data Analytics & Reporting:** Built automated reporting tools that generate sales, purchase, and stock summaries in professional, printable formats.
- **Secure Architecture:** Implemented **secure authentication** and **role-based access control (RBAC)** across various modules to protect sensitive medical and financial data.
- **Database Optimization:** Leveraged **Django ORM** for efficient database interactions and maintained a modular app structure to support future scalability.

TECHNICAL SKILLS

- **Languages:** Python (v3.10+).
- **Web Frameworks:** Django (v4.2+), Django REST Framework (DRF).
- **Databases:** MySQL (v8.0), SQLite (v3.x), PostgreSQL, Oracle.
- **Tools & IDEs:** VS Code, PyCharm, Jupyter Notebook, Postman, Swagger.
- **DevOps & Version Control:** Git (v2.x), Bitbucket, Docker, venv/PIP.
- **Front-End:** HTML5, CSS3, JavaScript.

EDUCATION

• Masters in Computer Science (MCS) Shri Ram Institute Of IT July 2022 – July 2024	64.04%
• Bachelor of Science (B.Sc.) in Computer Science Shri Ram Institute Of IT July 2019 – July 2022	88.16%
• Higher Secondary Certificate (12th) R.B.N.B. College, Shrirampur July 2017 – July 2018	53.38%
• Secondary School Certificate (10th) [School/Board] July 2015 – July 2016	77.20%

LANGUAGES

- **English:** Professional Working Proficiency
- **Hindi:** Full Professional Proficiency
- **Marathi:** Native or Bilingual Proficiency
